

Circle Of Concern Food Pantry

Feeding Families is Just the Beginning

August 15, 2019

To Whom It May Concern,

In 2018, Circle of Concern began work with B.C. Construction on several capital projects, including: installation of LED lighting throughout our warehouse and building, installation of new kitchen cabinets and countertops, overlay repairs to our parking lot, new fencing around our dumpsters, a remodel of our conference room, HVAC installation in our warehouse and other projects.

Frank Haase met with our staff and members of our Board earlier to assess our needs and advise on next steps; then assisted in collecting and assessing the bids for each project. He presented the project plan, bids and budget to our Board, addressing any questions or concerns. Once the plan was approved, work began without delay.

The B.C. Construction team managed every detail of the project plan, communicated regularly with each sub-contractor and oversaw every project to completion. Frank monitored expenditures throughout, ensuring that we stayed within the board-approved project budget. He provided regular updates to our team on the expenses to budget, as well as the timeline for each job so that we could plan accordingly.

Our satisfaction with the workmanship and materials was of utmost importance to Frank and his entire team. Any issues were addressed swiftly and professionally.

We are thrilled with the work that was done on our campus, and could not be more grateful to Frank Haase and the entire B.C. Construction team for the quality of their work, their customer service, and their leadership!

Sincerely,

Cynthia R. Miller
Executive Director
Circle of Concern
